

SHANTANU CHOUGULE

shantanuchougule7595@gmail.com | +91-7030366878 | github.com/shantanuchougule

Education

- D. Y. Patil College of Engineering and Technology, Kolhapur** **2022 - 2025**
B.Tech in Computer Science and Engineering (AI & ML) | Aggregate CGPA: **8.9**
- Sanjay Ghodawat Polytechnic, Atigre** **2019 - 2022**
Diploma in Computer Science Engineering | Aggregate Percentage: **86.91**
- Shri Hanumantrao Chate School, Kolhapur** **2018 - 2019**
SSC | Aggregate Percentage: **87.20**

Skills

Programming Languages: Python | SQL

Technologies & Tools: ReactJS | Vite | Ant Design | HTML | CSS | MySQL | Data Science | Machine Learning | Github

Work Experience

- ReactJS Intern** | Comtranse Technology | (6 months) **Jan25 - Jun25**
(Technologies Used: React, Vite, Ant Design, JavaScript, HTML, CSS, React Router DOM, Axios)
- Restaurant Table Booking Web App:** Developed a fully responsive multi-page restaurant website for "Tandoor" using React and Ant Design, featuring a dynamic booking system with real-time table and slot availability similar to Book My Show. Implemented smooth navigation, modern UI components, and interactive user experience.

Projects

- Smart Bike Price Prediction using Machine Learning** **2023**
(Technologies Used: Python, Machine Learning, Data Analysis, Pandas, Scikit-Learn)
- Bike price prediction is a practical application of machine learning and artificial intelligence that aims to estimate the price of a vehicle based on various features and historical data.
 - The goal of this predictive model is to assist buyers, sellers, and dealerships in making informed decisions by providing a reliable estimate of a Bike's value.
- Automated Food Recognition and Personalized Health Recommendation System** **2024**
(Technologies Used: Python, Computer Vision (CNN), Google Gemini API, Stream lit, PDF/Report Generation)
- Developed a full-stack AI-driven health application integrating deep learning models (MobileNetV2) and Google Gemini API to perform food recognition, calorie estimation, and personalized diet/workout recommendations.
 - Built with Python and Streamlit frontend, demonstrating strong AI integration, API orchestration, and product engineering skills.
- RecipeGenie : AI-Powered Personalized Recipe Generation Web App** **2025**
(Technologies Used: React, Tailwind, Supabase, OpenAI GPT, Lovable AI Platform, PDF/Report Generation)
- Developed Built a full-stack AI-driven Web App using GPT and Supabase on low code Lovable AI platform, enabling personalized recipe generation with dynamic nutrition per serving, ingredient-wise cost estimation, recipe scaling, dietary preference customization, and automated PDF report downloads demonstrating AI-augmented product engineering capabilities across frontend, backend. (**live** - <https://recipegeniee.lovable.app/>)

ACHEIVEMENTS & CERTIFICATIONS

- Techquizaton 2.0** - Secured 2nd Rank in National level Techquizaton conducted by DYP CET
- Research Papers** published in international journals IJCRT and IJRPR on AI and health-tech applications.
- Copyrighted AI System Architecture** titled "Automated Food Recognition and Personalized Health Recommendation System", registered under L-158698/2024 by the Government of India.
- Machine Learning From Basic to Advanced** – by Code Warriors via Udemy.
